Summary

Full Stack Engineer with 6+ years of experience, specializing in backend development and system architecture. Highly skilled in designing robust, scalable server-side logic for complex enterprise applications, including SIMRS, School Management, E-Commerce, and ERP systems. Primarily focused on distributed systems, event-driven architecture using RabbitMQ, and advanced API design. Fully equipped to deliver end-to-end solutions by proficiently building and integrating frontend interfaces with Vue.js and React.js.

Education

Politeknik Negeri Malang — Bachelor in Applied Informatics Engineering
Applied Informatics Engineering — January 2020 - December 2024

SMK PGRI 2 Ponorogo — High School in Software Engineering (Rekayasa Perangkat Lunak)
Software Engineering (Rekayasa Perangkat Lunak) — January 2017 - December 2020

Experience

PT Ekosistem Kesehatan Indonesia (Nexmedis) — 2025-03-01 -2026-04-14
Backend Developer
Full-time

- Developed backend services for AI-driven healthcare platforms using Golang and Node.js.
- Designed gRPC-based inter-service communication and RabbitMQ event-driven workflows.
- Optimized performance using Redis caching and background job processing.
- Deployed containerized services with Docker and automated pipelines via CI/CD.
- Contributed to a patient room transfer system, improving hospital operational efficiency.

https://nexmedis.com/

PT Visi Multi Media Aditama (rSchoolToday) — June 2022 - January 2025
Full Stack Engineer
Remote, Contract

- Built and maintained end-to-end web applications using Symfony/Laravel (backend) and Next.js (frontend).
- Migrated legacy systems to modern architectures, improving performance and developer productivity.
- Implemented RabbitMQ-based event-driven synchronization, reducing latency by 35%.
- Designed REST APIs consumed by frontend applications and third-party services.
- Managed deployments using Docker and AWS (EC2, S3).

PT NICE Media Technology April 2023 - August 2025
IT Product Manager
Remote, Full-time

- Managed full product lifecycle for education technology platforms.
- Worked closely with backend and frontend engineers to define technical architecture and feature scope.
- Balanced product requirements with technical feasibility and system scalability.

PT NICE Media Technology May 2021 - April 2023
Senior Full Stack Engineer
Remote, Full-time

- Led development of multiple production systems using Laravel, Livewire, Docker, and relational databases.
- Designed scalable backend structures and collaborated on frontend feature delivery.
- Mentored junior developers and enforced coding standards.

PT NICE Media Technology September 2019 - May 2021
Full Stack Engineer
Remote, Full-time

- Developed a full school payment system using Laravel, handling billing and transaction flows.
- Improved system reliability and maintainability through refactoring.

PT IGRA Solusi Kreatif October 2021 - April 2022
Team Lead Backend Developer
Contract

- Led backend development for e-commerce and digital wallet platforms.
- Improved transaction throughput by 40% through backend optimization and database tuning.

PT Atlas Global Teknologi December 2021 - April 2023
Part-Time Full Stack Developer
Part-time

- Developed SME applications including a laundry management system, improving operational efficiency by 30%.

PT. INOSOFT TRANS SISTEM Surabaya
Software Engineer Intern January 2019 - December 2020
Contributed to the development and maintenance of various client-facing web and desktop applications utilizing Laravel, CodeIgniter, and .NET.

Projects

Key Achievements
Milestones and performance impacts

- Led a major legacy PHP system revamp, transforming a monolithic codebase into a scalable and maintainable architecture.
- Refactored legacy MVC pattern into Domain-Driven Design (DDD), improving code structure, testability, and long-term maintainability.
- Performed database normalization and implemented Redis caching, significantly reducing query load and response times.
- Migrated legacy Blade (.blade.php) frontend into a modern Next.js application consuming REST APIs.
- Optimized containerization using Docker and FrankenPHP, and established automated CI/CD pipelines.
- Achieved up to 70% system performance improvement in speed and overall responsiveness.

Skills

☆ **Backend**
Golang (Gin, Echo), PHP (Laravel, Symfony), Node.js, Python (ML/AI fundamentals), REST & gRPC APIs

☆ **Frontend**
Next.js, React, Livewire, Vue.js

☆ **Architecture**
Distributed Systems, Microservices, Event-Driven Architecture, Multitenant Systems

☆ **Messaging & Cache**
RabbitMQ, Redis

☆ **Database**
PostgreSQL, MySQL, MongoDB

☆ **DevOps & Cloud**
Docker, CI/CD, AWS (EC2, S3)

☆ **Tools**
Git, Jira, n8n, Jupyter Notebook
